

**Ali**  
 Lighting Modular Bench, Milan, Italy, 2010  
 First prize - Decò competition  
**studio wok with Paolo Capellini  
 and Tomaso Musicco**

Ali is a modular system of seating, a large illuminating carpet, a urban living room. The light of Ali interacts with the city lights, its monuments, its squares, becoming a city lights itself. Ali is born from the idea of the city as a meeting place, a city that values public spaces, the socialisation and cultural exchange. Ali consists of 35 modules with base 50 x 50 cm, placed on a metal structure which hides all the technological apparatus. Each module features a LED bulb and is made of sheets of translucent Corian glacier ice thick 6 mm, which allow the light to spread evenly.
